

REMARKS

The application is to be amended as previously set forth in an effort to conform the application to Office practice. All amendments are made without prejudice or disclaimer. Generally, the amendments to the claims remove multiple dependencies from the claims, and do not surrender any scope of any claim as originally filed. Claim 10 claims the invention of now canceled original claim 1 in a format more common with Office practice. Support for the new claims is found in the original claims. The amendments to the specification correct the title of the application to more accurately describe the invention, and provide further detail as to the identity of a prior patent publication. No "new matter" has been added.

If questions remain after consideration of the foregoing, the Office is kindly requested to contact applicants' attorney at the address or telephone number given herein.

Respectfully submitted,

Allen C. Turner
